Kitchen

Grad45

Original system kitchen to enjoy
the beauty of all stainless steel

"Glad45" packed with the commitment of the Sanwa Company. The entire surface is made of stainless steel, and the design is designed to eliminate the waste and highlight the upper texture of the material. The door and side panels are processed so as not to see the small part, and processing is thoroughly taken care of, so that the image is clean and thorough. Because it is all stainless steel, it is hard to generate mold and can be used cleanly. In addition, it is possible to select vibration finish as an option, or to incorporate a dishwasher from an overseas manufacturer. It is possible to realize the ideal kitchen, which is only available in the order kitchen.

Features of Glad45

There is also a wide variety of layout options such as the type that can be used for storage on the dining side, and the counter type. In addition, we were obsessed with the details, such as the large-capacity pull-out type storage that the pot and bowl can be stored neatly, the large multi-functional sink that is easy to use, etc. without partition plates.

Design that balances appearance beauty and performance. We adopt stainless steel as a whole. Despite being a high-class design, it has been finished with an emphasis on ease of use.

Stylish corner sink that craftsmanship shines. The sink is designed with sharp corners. It is finished with the outstanding skill by the craftsman who is producing the kitchen for professional use.

Fastening process that you can feel the attention to detail. The high welding technology and the craftsmanship have made it possible to finish the "Clamping Process" where the small edge is not visible.

Base wood conscious of work efficiency. Workability was improved by putting the baseboard of the foot in the back a little.

Vibration finish also available as an option.

A popular vibration finish that makes small scratches and fingerprints on the surface less noticeable. Only the top board vibration, you can choose from two types of finish of the vibration both the top board and the body.

Optional imported dish washer

A high-performance dishwasher can be optionally installed to wash more than 10 dishes at a time. You can choose from 2 brands: Miele and Gaggenau.

Storage

1. A large-capacity drawer that can properly store cooking utensils and seasonings can be silently opened and closed using silent rails.
2. The wall cabinet is kept at the minimum required storage capacity, it is easy to handle, and it does not press the space as an interior.
3. We use stainless steel for interior and storage shelf. While having enough storage capacity, it is a beautiful design like a mirror.

You can choose the finish

The standard is a hairline finish, but you can choose from two options: "Vibrate only on the top" and "Vibrate both on the top and body".

Elevato

High-grade model stuck to the details

“Elevato” is a high-end model original kitchen with attention to detail and attentiveness to those who use it. Including 6 cm thick stainless steel top plate with skilled craftsman's skill, such as drawer with excellent storage capacity, it is excellent not only for luxury but also for convenience.

Characteristics of Elevato

6 cm thick handmade top board in pursuit of beauty. Japanese craftsmen carefully finish each piece from cutting, bending, welding to polishing. The square that can not be reproduced by machine is attractive.

Pro is also highly acclaimed, jumbo sink is the skill of the master. The corner sink of 80 cm in width was asked to the craftsman who is producing a professional kitchen.

With a drawer with excellent storage capacity, small items around the kitchen are refreshing. As well as the inner drawer which made the best use of the dead space, it equipped with a small drawer that cutlery (knife, fork, etc.) and chopsticks etc. can be put on the top plate. In addition, all drawers adopt a 45° cut clue design and Brum (Austria) silent rail, and can be opened and closed quietly and easily.

*Depending on the size, there is also a thing without a drawer on the top plate.

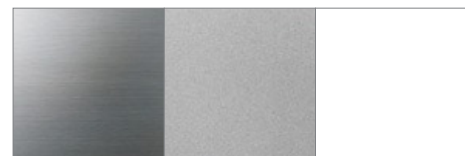

Body Color

White (Mirror Surface) White (Matte) White (Wood Grain) Black (Mirror Surface)

The thickness of the baking sheet is 40 mm for grilled stoves and 60 mm for grilled stoves.
The artificial marble top plate can be set only when you select a grilled stove.

Plain-K Medium

The pride of Maid in Japan, combined
the skills of the artisan

Family type system kitchen in pursuit of
functionality, design and cost performance

An original kitchen featuring a large pull-out capacity storage and a simple design. A wide variety of options are available, including IH cooking heaters and dishwashers, for a variety of layouts.

Features of Plain-K Medium

We were also particular about the details, such as the large-capacity pull-out storage where the partition plate was eliminated and the pots and bowls could be stored neatly and the large multifunctional sink that was easy to use.

1. Because there is no large-capacity storage divider of All Slide , pots and bowls can be stored clearly. It is a pull-out type that can be easily taken out the stored items in the back.
2. Production of high-quality and multifunctional sink stainless steel top plate and sink One solid 48 years of experience and history tell a certain quality. It is an easy-to-use multifunction sink with a wide 730 mm. Because it is with a basket, detergent can be stored properly.
3. We keep open angle. Wall cabinet adopts bounce type. The door uses Bulm (Austria) bounce hinges that can be stopped at any angle.

Witte

"Attractive" kitchen in the "show" era

"Witte" has achieved high design at a price range that is easy for many people to reach. While valuing the realistic texture, we are particular about the beauty of the details and finished it in the ultimate minimal design with outstanding edges. The floating style that floats in the air creates a lightness that doesn't become too heavy. It is a kitchen that will become the standard in the future, sublimating LDK into a space that people want to see.

Now that SNS and video calls have become commonplace, people's lives can be unintentionally seen. LDK, which is often seen by people, is a space that strongly reflects the feelings of the residents. "Witte" has a large selection of materials that stimulate the sensibilities that people want to see. Among them, "Allegro Wood" is impressive with its bold vertical wood grain reminiscent of an overseas kitchen. The beauty of the material is emphasized by eliminating the lines that cause noise in the design to the utmost, giving a high-quality and modern impression.

"Cement Silver" that mixes the trendy mortar and metal expressions

Fastening process to create sharp edges

At the corners, the visible lines are consolidated into one and a beautiful edge is expressed by "fastening" that cuts the end of the wood at an angle of 45 ° and abuts it.

Top plate as thin as possible

A stainless steel top plate consisting of only straight lines. By making the finding as thin as possible, it gives a more sophisticated impression.

Baseboard with workability in mind

The floating style with a pedestal at your feet also has the effect of maintaining a comfortable working posture by taking a step forward.

Square shaped sink

The sink also pursues a minimal design. It has a stylish finish with a square shape that suppresses the roundness of the corners.

Existence like furniture even when not in use

The texture is emphasized by eliminating the lines that cause noise in the design to the utmost limit. It stands beautifully even when not in use, creating a high-quality kitchen space.

Commitment to detail

The storage space is designed to be pulled out by hand. We have eliminated the handle and stuck to a design that looks neat.

The drawer has a size and depth that makes it easy to store large pots and cooking utensils.

For face-to-face plans, we also offer a 915 mm depth type with a storage space on the dining side. Convenient for storing your favorite tableware and small items used in the dining room.

Color Variation

6 color variations and clues • A total of 12 patterns of 2 colors are available for the pedestal. Please enjoy the coordination that suits your interior by freely combining them.

Q.D.Haan

Combination of value kitchen

Features of Q.D.Haan

In Kyoto, we call it "Okudon". Kuh Dhan uses "Okudon" as its source, and recalls the old and nostalgic sectional kitchen. The combination of cabinets can make up a kitchen from 1650 to 2100 mm. Open door types and drawer types are available to meet the ease of use required by each individual.

Features of Q.D.Haan

1. Simple sync does not choose how to use.
The faucet hole was placed on the center line of the sink to make it easy to use.
2. A stainless steel L-shaped cover is attached to the gap between the stove and sink to prevent the entry of dirt and water.
*The gap between the stove and workbench will be the same finish
3. Simple stainless steel handle improves usability and design.

Sency

Steel compact kitchen with impressive metal texture and thin look

Now you can choose the finish of the worktop.

In addition to the standard hairline finish, the worktop now has an option for a high-quality vibration finish, with small scratches and fingerprints on the surface less noticeable.

Features of Sency

"Sency" that makes full use of the texture of metal such as steel and stainless steel. By thinning the worktop and sides to the limit, a simple, sharp and sophisticated design is realized. The cabinet that has been embossed-painted has a high-quality matte feeling and is processed so that the dirt is less noticeable.

Choice of color, size and price

You can choose from 2 colors of chic, sober black and gentle white. There are three types of W1500, which can be used comfortably, from a minimum size W900 combining a sink and an IH heating device (one bottle), W1200 with a large sink and cooking space.

Compact Kitchen 430

Good Design Award Winning Popular Model

Form that imaged box. Imagine a box of stainless steel, eliminate the handles that would give rise to a sense of unevenness, and pursue a simple design. It is a stainless steel kitchen that has won the Good Design Award for "Minimal Style" that has been designed to eliminate waste to the limit. It is easy to get familiar with the background, and the layout and layout can be expanded.

Features of Compact Kitchen 430

“Compact Kitchen 430” is an original compact kitchen that meets all of the appearance, functionality, and price that we planned and designed. We perform design processing by the craftsman's hand even in small areas, and offer quality over price. It is a kitchen that can meet all needs such as designer's apartment, senior apartment, and second kitchen.

All stainless steel. The material used is stainless steel that is resistant to rust, smell and dirt and easy to maintain. Above all, we adopted SUS430 No. 4 (a type of stainless steel) often used in the kitchen and so on. Because the magnet is attached to the specification, you can produce your favorite cooking space with recipes and memo stand. Also, since no harmful substances such as formaldehyde are generated at all, you can use it with confidence. Furthermore, because it is all stainless steel, it has high recyclability and is environmentally friendly.

Compact but abundant storage capacity. I was particular about the drawers that can be pulled out completely and used effectively, and detailed places such as a kitchen knife. Furthermore, the thickness of the main body is made thinner by manufacturing with sheet metal, and it was made to be able to secure the maximum storage capacity. In addition to being compact, it also has practicality that storage capacity is satisfactory.

Float Kitchen 430

All stainless kitchen that realized
the fine commitment

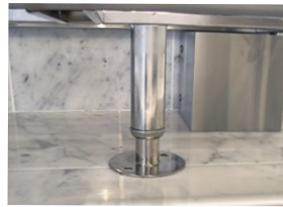

The design compact kitchen has been finished to look light even in all stainless steel by giving the impression that it floated from the floor so fitly. As we are particular about not only design but also drawer storage and the capacity, usability is convenient.

Features of Float Kitchen 430

Stainless kitchen with enhanced design.

The waste was removed to the limit, and it was finished in the design which pursued a sense of luxury more based on popular "Compact Kitchen 430" with a clean design. Of course the design is a kitchen that combines practicality.

1

2

Create a sense of luxury with legs for the interior

In order not to feel the weight of the stainless steel, with the legs to float the whole, produced a sense of freedom. The legs are for interior furniture. The support legs are cut out of aluminum, and the spiral groove has a sense of luxury.

*Since the height adjustment function is not included, please install on a smooth surface. Especially in the island type, the influence of the installation surface is strong, so please be careful.

There are two floor-fixing legs to prevent tipping on the island. (* 1)
Remove the bottom plate under the drawer and fix it to the floor with a screw. (* 2)

You can pull out all the way with a quick pull-out.

It is designed so that you can take out the inside without getting squatting and take out the back one. Furthermore, we adopted the silent rail which does not mind the sound of opening and closing. In addition, in order to make it easy to pull it out, it is folded in diagonally to make it easy for your fingers to catch.

Height 850 mm (legs: 150 mm)

Minimorous

Simple design of everything for free in the rental housing and second kitchen

A stainless compact kitchen that is extremely simple. Of course, as a studio or second kitchen, it is also popular in the designer's apartment. You can use your own space at your feet to create your own space, and you can adjust the height so you can use it in a wheelchair.

Features of Minimorous

Realize free space in your feet

Because there are no feet at your feet, you can place large coffins and boxes that will not fit in a typical kitchen. It can be used as a storage space, and can also do housework while sitting with a chair. Usability is endlessly extended depending on the idea.

A spacious, easy-to-use sink

Stainless steel processing expert craftsman is a handmade kitchen carefully manufactured one by one. It features a spacious sink for easy cleaning of dishes.

Features of Minimorous

I cut the small part diagonally and cut the small part diagonally so that the impression clear top board looks thin, and I made the impression that it was clean and clear. You can also use a thin sink to expand your foot space and sit and work in your chair.

You can use it smoothly even while sitting on a wheelchair by adopting a kitchen foot through which can be used in wheelchairs and a shallow sink.

Estico

Bring out a new look of melamine with
minimal design

Estico was developed focusing on "Melamine", which has spread as a durable material. Using melamine all the way to the door, top plate and side panel, the minimal design brings out the new charm of popular materials.

Estico's Feature

Melamine has been popularized as a durable material since around 1950. Focusing on this melamine, the compact kitchen developed is "Estico". I used melamine for everything from the door to the table top to the side panels. Furthermore, the minimal design brings out the new charm of popular materials. The name is derived from the Italian "Estetico (aesthetic)". A refined and beautiful appearance enhances the atmosphere of the space. It is recommended for a particular living space such as designer's apartment.

Stainless Shelf

Stainless steel shelf that makes the kitchen look neat

Introducing a type with LED lighting

A new LED lighting type has been added to the stainless steel shelf, which makes "showing storage" a breeze. LED downlights under the shelves gently illuminate the tools on the shelves and the hands you work with. The switch is located in the back of the shelf and does not spoil the stylish design.

A neat design that does not show the fixing brackets

In pursuit of a neat design, this is an original stainless steel shelf that uses a structure that does not show the fixing brackets. It matches not only the kitchen but also spaces such as the washbasin and living room. This multi-open shelf is recommended for those who want to store their special cooking utensils and seasonings in a stylish manner.

Plain-V Upright

An all-in-one wash basin

I named the upright piano a motif. The high-back Plain-V is popular for its ease of use. The deep sinks and shower faucets, which were requested by designers and architects, have been adopted.

Features of Plain-V Upright

1. The depth of the highback rise is 7 cm. You can place a cup or hand soap.
2. Deep type bowl integrated top plate.
A matte artificial marble top plate with a sense of cleanliness. There is no gap because it is integrally formed, cleaning is easy.
3. Shower mixing faucet As a standard feature, a convenient shower mixing faucet can be switched to foam water .
4. The simple and sophisticated mirror box is excellent in storage capacity.

New color black that creates an impression one rank higher

A highback washstand that rises along the wall, named after the upright piano motif. The easy-to-use deep sink and shower faucet are popular with families with a large number of people. New color black is also compatible with black appliances and furniture. Finish in the wash space one rank higher.

Pattina Vanity

We express vintage feeling with
wooden tone × steel leg

An unprecedented modern vintage taste sink, "Pattina Vanity". It was made up of wood grain facing, black frame and artificial marble overbowl according to the kitchen "Pattina Kitchen" in the same series.

Wood grain facing and black frame, artificial marble overbowl

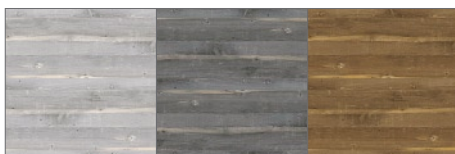

An unprecedented modern vintage taste sink is now available. According to the kitchen "Pattina Kitchen" of the same series, it was composed of a rough wood grain surface material, a sober black steel frame and an artificial marble overbowl. The design emphasizes the texture with simplicity in mind, and also considers the beauty of details such as the fit of the corner. In addition, because it is a float type that floats from the floor, I do not feel a sense of pressure on the space. Even in the water, please enjoy creating a space full of your own vintage feeling.

Features of Pattina Vanity

A top board that produces a sense of unity by matching the face material and the pattern. The wash bowl was committed to reducing the roundness of the corners. The push-pull open type drawer is a convenient drawer for storing toiletries. Opening and closing is also smooth.

Kubire Vanity

Color the washroom space with a Kubire accent color

A wash basin with an impressive "Kubire Color" applied between the top plate finished in white and the cabinet. The artificial marble wash bowl features an elegant line that includes sleek curves and sharp straight lines. In addition, since it is an integral type, there is no seam and maintenance is easy. You can also enjoy coordination with "Kubile Kitchen". The drawers are push-open with no handles, so they can be easily opened and closed with your knees even if your hands are wet. The storage type is hard to pull out of the dead space type, so it can be stored up to the kick part, so it fits in more than it looks.

**GOOD DESIGN
AWARD 2015**

Features of Kubire Vanity

A 30 mm high line between the white artificial marble bowl and the cabinet was accented. By the constriction, it is finished in the design that the top board floated. There are 5 colors of yellow / orange / blue / gray / white in the black part. You can choose according to the space.

Plain-V Mini

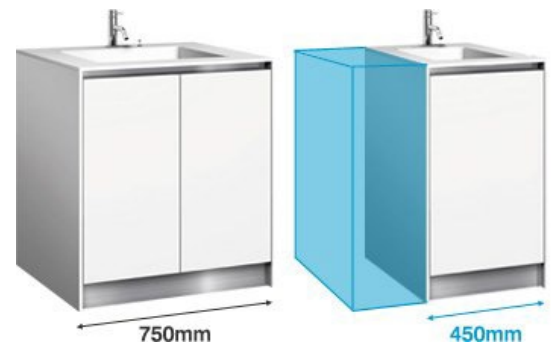

45 x 45 cm minimum wash basin ideal for studio planning

It is a mini-basin ideal for locations with limited space, such as studio apartments. Because it is a size that does not matter where it is placed, it is possible to provide a compact but independent washbasin.

Features of Plain-V Mini

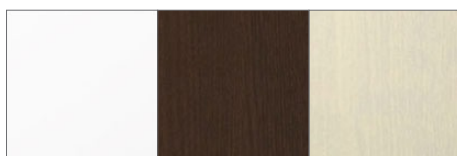

Space saving so much with a Plain-V Mini

The "Plane-V Mini" is a compact washstand with a width of 450 mm, so it can be installed in 60% of the space required for a conventional 750 mm wide wash stand, creating a freely usable space. It can also be used as a second unit for applications such as washing immediately after waking up and brushing teeth before going to bed, even in bedrooms, corridors and other places other than washrooms.

1. Easy-to-use design that does not get tired of faucets. It can be changed to a shower faucet as an option.
2. The metal eyelet is removable and has a small hair catcher.
3. Artificial marble top plate is pursuing the sharpness in the bowl and integrated.
4. We produce high-quality accent with base wood stainless steel.

Fine Counter

A light and sharp design wash basin on which you can place your favorite bowl

Now you can choose the finish of the worktop.

Fine Counter was born from the design. We prepared only a wash basin so that you could set your favourite bowl.

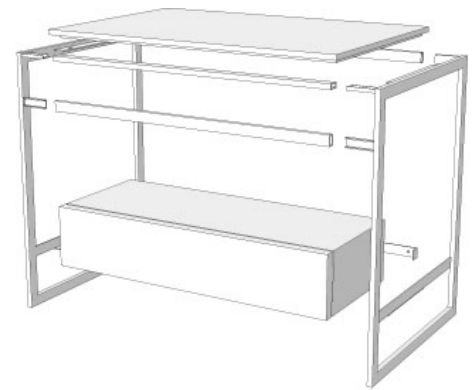

Light and sharp frame design

"Fine Counter" was born from the same design concept as "Fine Counter". We prepared only a wash basin so that you could set your favorite bowl. Composed of a thin frame of 12mm x 25mm, it is a design that brings about the spread to the washroom space. The bar on the front can also be used as a towel rack, with functionality in mind.

Knock down method that can be easily assembled

"Fine Counter" is a knockdown product that can be easily assembled on site. We also consider loading and storage areas in a compact package. Assemble the frame, fix it on the wall, attach the storage (shelf) and the top, and you're done. It has a simple shape but secures its strength.

Sency Vanity

Sency Vanity that makes full use of the texture of the metal

While using heavy steel and stainless steel as the material, the top plate and side plates are made as thin as possible to express a simple, sharp and sophisticated design.

Features of Sency Vanity

The sharp and solid design creates a sophisticated washroom space

"Sency washbasin" that makes full use of the texture of metal. While using heavy steel and stainless steel as the material, the top plate and side plates are made as thin as possible to express a simple, sharp and sophisticated design. In addition, the cabinet is embossed with high quality, the top plate and bowl are inorganic + organic hybrid coating with high hardness and excellent stain resistance and weather resistance, and the matte finish of the same color is unified to create a high quality sense of unity. Furthermore, because it is a wall-mounted type, it gives a clean and mellow impression to your feet.

Clean feet without a piping cover

The water-resistant hybrid coating also has a matte texture.

The bowl is made of rust-resistant stainless steel (SUS304) with a hybrid coating of inorganic and organic, which has high hardness and excellent stain resistance and weather resistance. You can use it with confidence even if you wash your hands and face repeatedly every day. The matte texture with reduced luster also brings a high-quality image to the washroom.

Clean storage while maintaining design

A slide type that can be stored by hanging it out. With a simple design without a handle, plenty of toilet accessories can be put in, and you can easily take out the things in the back.

Asse

Find the thin edge line of the trend

The trend in recent years is for wash bowls with thin edges. "Asse" has realized a thin edge line that cannot be expressed with artificial marble or pottery.

Find the thin edge line of the trend

The trend in recent years is for wash bowls with thin edges. "Asse" has realized a thin edge line that cannot be expressed with artificial marble or pottery. Inorganic + organic hybrid coating with high hardness and excellent stain resistance and weather resistance is used for coating. The black and white color development harmonizes with the washroom space of various tastes. Even if you install multiple items side by side in a commercial facility, you can create a sophisticated and stylish atmosphere.

The clean design is comfortable even if you look closer

A wash bowl with a very thin edge line that accentuates the square shape. With the same finish as the bowl, it covers up to the drainage plate, pursuing a cleaner impression. It is recommended to coordinate the faucet with a simple design to match the bowl.

Spinning

Artistic beauty created by craftsmanship "spinning"

This technology has been used for processing pots, kettles, bells, etc. for a long time, but large products such as aircraft, space rockets, and parabolic antennas cannot be mechanized like press processing, and even now, this "It is processed by "spinning".

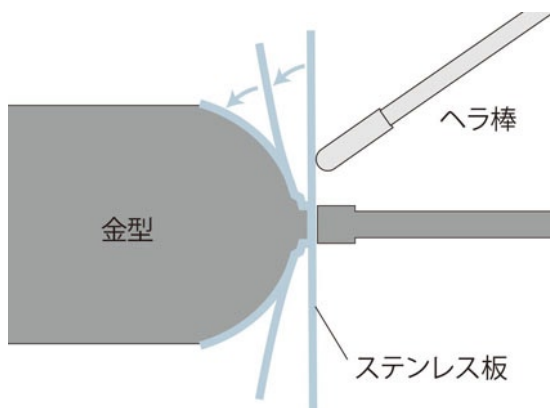

* Spinning is a processing method in which a metal plate is rotated and a spatula is pressed against it to gradually deform it.

Processing

For spinning, the drainage part is press-molded with a mold into a circular bowl processed by this "spinning". A stationary bowl made by welding a skirt made of a flat metal plate into a roll.

The texture, lightness, and compact size that pottery does not have make it an item suitable for new space proposals.

Mechanism of spinning

Luxury hairline finish

Fucca

Balancing trend design and daily needs

I want to create a fashionable washroom space. However, practicality such as ease of use and ease of maintenance is still important. The wash bowl "Fucca" that is perfect for such people was born. The thin edges that can only be achieved with artificial marble, the color development that incorporates black and gray, and the matte texture are exactly the designs that meet recent trends. Since it is installed so that it covers the counter, it has a neat impression that only the upper part can be seen, but it is wider and deeper than it looks. It is also recommended for those who do not want to spend time cleaning because it is hard to get dirty. A deep bowl and hooker that pursues both design and ease of use.

Features of Fucca

Spacious size that looks neat but is also convenient for soaking and washing

The size and depth are such that buckets can be easily put in and can be left and washed. The faucet is installed inside the bowl, and the 4 mm wide rise surrounds the bowl so that there is no dripping and the area around the bowl is less likely to get dirty. In addition, the depth is 220 mm, which is sufficient to prevent water splashing. In addition, the top lid of the plate on the bottom is made of the same color and material as the bowl, and attention is paid to details so that it looks cleaner.

Designed for easy daily care

4mm thin edge rise prevents water splash

The top lid of the eye plate has the same color finish for a unified design

A wood plate that can be attached and detached, and can be conveniently used to decorate small items or temporarily place toiletries. We have prepared two colors, clear and dark, so that you can enjoy coordination according to the bowl color. Although it is made of solid wood, it has a thinness of 4 mm and is matched with the edge of the hooker.

Enjoy coordinating with counters and accessories

Coordinating the washroom space will be even more fun from the encounter with the highly designed "Fucca". Excellent compatibility with Sanwa Company counters, mirrors, faucets, etc. As an option, we also have a wood plate that you can hand over to the bowl to place small items.

Option

Wood Plate

You can choose from two colors, clear and dark, to match the color of the bowl. With a simple design that fits the bowl, the warm wood look is a casual accent.

Lepto Counter

Counter-type hand wash basin in pursuit of minimalism

It is a counter type, a series product of the slim hand wash basin " Lepto ". You can effectively utilize the dead space of the toilet space, and you can design a toilet space with a clean appearance and space. The artificial marble counter is seamless and easy to clean and can be used hygienically. In addition, since it can be cut on-site according to the space, it can be installed according to the space.

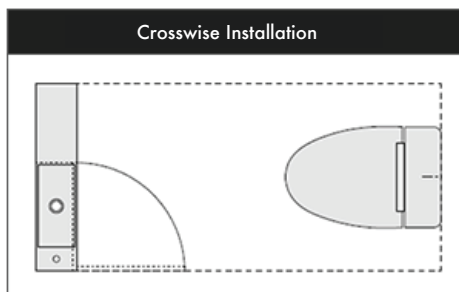

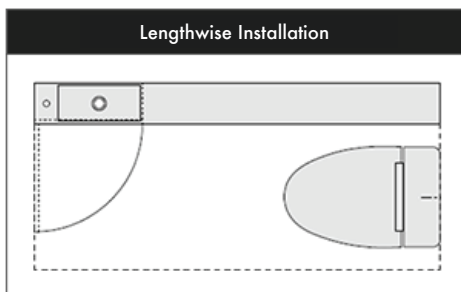

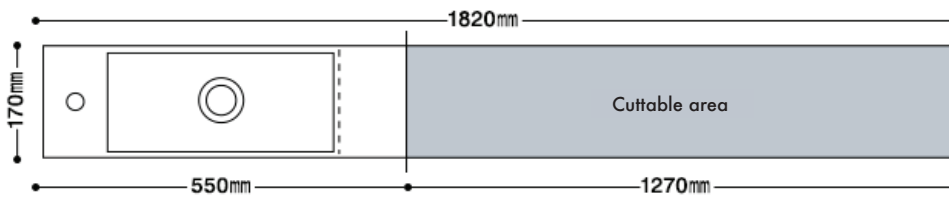

Selectable wall-mounted / stationary type with storage and counter stand-alone type

The wall-mounted type and stationary type storage are thin, yet have a depth that allows toilet paper to fit. In addition, because it has a back plate, it does not affect the wall finish such as cross tiles.

Option for exclusive use of Lepto counter

Dedicated options "Lepto Counter Towel Bar" and "Lepto Counter Paper Holder" are made of stainless steel with a mirror finish (SUS304). Since the mounting position and installation direction are freely set, it is possible to install in the layout of your choice.

Artificial marble counter that can be cut according to the frontage

Due to the slim design with a depth of 170 mm, it can be installed in a toilet with a frontage of 780 mm and 0.5 tsubo. The 1820mm counter can be cut on-site according to the effective opening, making it ideal for remodeling.

* The bowl counter is double-sided. It is also possible to turn it over and install it on site.
